## Meeting Notes:

Errors macro script

Image Size:  $32 \times 32$ ,  $64^2$ ,  $128^2$

Window, : 48  $\rightarrow$  50% more

16 patches  $\rightarrow$

Patch level eval 10

train on train

eval on dev

eval on eval

$\frac{420}{427}$

QDA and Random Forest

Confusion Matrix

Patch Level Classifier by And of neighbors

Majority Vote of Frames

Given the region of label from label file, check to see if majority vote matches given label annotation

We have the frame level classifier ready.
